Return on Investment | **QIPP Delivery** | **Performance**

QOREX for CCGs is the version of our remarkable Business Management Software specifically for CCGs. This CCG specific software helps CCGs overcome the challenges of managing commissioning and delivery in the context of integrated health and care systems and financial constraints.

Your Challenges

• Decision making

How do you combine information to make the best decisions? How do you bring together and effectively prioritise your investments in transformation and business as usual?

• QIPP

How do you make informed choices about where to invest in your QIPP programme? How do you quickly and easily produce QIPP reports with accurate and timely information?

• Financial performance and accountability

How do you assess the impact and implementation of the CCG Improvement and Assessment Framework from NHS England? How do you develop strategies to address resource and financial pressures to strengthen financial performance and accountability?

QOREX for CCGs connects CCG commissioning plans with integrated health and social care plans, and NHS England's Improvement and Assessment Framework. Performance monitoring becomes an integral and straightforward part of managing your CCG organisation. QOREX for CCGs does this by bringing together the array of measures, targets, outputs and KPIs you wish to achieve, and connects these to your drivers and objectives. This improves decision-making and enables you to manage and report across integrated health and care systems and commissioning types.

You don't have to take our word for it, here is what one NHS client/user says:

"QOREX has skillfully demystified the complexity that was our STP portfolio and revealed a hidden beauty in a simplified and ordered governance. Pure brilliance!" Adele Yemm, SW London STP

QOREX Software

QOREX encompasses comprehensive and easy to use business management functionality. From objective setting to delivery management, benefits management to risk management, QOREX is quick to set-up and intuitive to use.
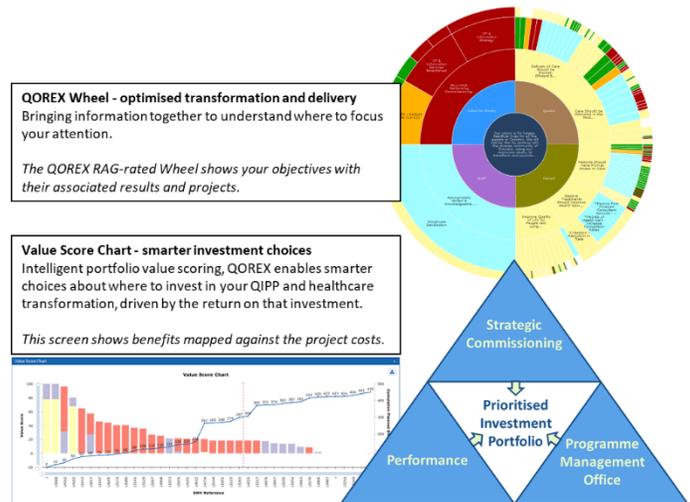

QOREX is secure and meets best practice (OWASP) cyber security principles. Role based access control ensures appropriate levels of security within QOREX and hosting is UK based using dedicated servers.

Working together with QOREX

At QOREX we are passionate about making a difference to health and social care. We know that services are under real pressure. We are keen to work together to help you achieve your goals and objectives.

The quantifiable benefits that you can expect from QOREX:

QOREX Wheel - optimised transformation and delivery
Bringing information together to understand where to focus your attention.

The QOREX RAG-rated Wheel shows your objectives with their associated results and projects.

Value Score Chart - smarter investment choices
Intelligent portfolio value scoring, QOREX enables smarter choices about where to invest in your QIPP and healthcare transformation, driven by the return on that investment.

This screen shows benefits mapped against the project costs.

- You are more able to focus on those areas that have the biggest impact in achieving CCG objectives – maximising the return on your investment in transformation.

- Overlap and duplication is highlighted across the CCG, supporting you to reallocate resources and thereby manage cost even more effectively.

- Quick, easy and automated reporting across your organisation and wider stakeholders – reducing the time taken on reporting.
