

QOREX PATH for STPs is the Health and Social Care version of our remarkable Business Management Software. This STP specific software helps STPs/ACs overcome the challenges of managing STP delivery to achieve health and social care transformation.

You have developed STP plans that address the health and care needs of your local population and meet NHS England requirements. The inherent complexity of these plans virtually guarantees delivery challenges. QOREX PATH offers software that hands you both clarity and control of your STP plan and fosters collaboration.

Your Challenges

A partnership approach to planning healthcare delivery across a local area is a radical shift from the existing commissioner/provider approach. As a result you face a number of challenges:

- **Clarity**
 How do you ensure that your plans are easily understood, focused and prioritised?
 How do you see a clear line of sight from your objectives to STP plan execution?
- **Collaboration**
 How do you assign and manage accountability and responsibility for achieving your STP plans?
 How do you share delivery across the partnership?
- **Control**
 How do you control delivery across a diverse and dispersed range of stakeholders in your local health and care system? How do you implement an effective and affordable governance structure?

QOREX PATH connects STP performance with transformation. Performance monitoring becomes an integral and straightforward part of managing the STP plan not simply feeding the information beast. QOREX PATH does this by bringing together the array of measures, targets, outputs and KPIs and connects these to your transformation drivers and objectives.

You don't have to take our word for it, here is what one NHS client/user says:

“QOREX has skillfully demystified the complexity that was our STP portfolio, and revealed a hidden beauty in a simplified and ordered governance. Pure brilliance!”

Adele Yemm, SW London STP

QOREX Software

QOREX encompasses comprehensive and easy to use business management functionality. From objective setting to delivery management, benefits management to risk management, QOREX is quick to set-up and intuitive to use. To help you further we have pre-populated an STP instance of QOREX for you, making it STP specific. QOREX PATH specifically addresses the challenges of STP delivery that you face.

QOREX PATH has been developed through significant desk research and tested with an STP. It draws on both NHS England metrics and local population needs and ambitions.

Taking this approach QOREX PATH enables a clear line of sight from drivers for change, objectives, targets and workstreams to benefits and outcomes.

QOREX is secure and meets best practice (OWASP) cyber security principles. Role based access control ensures appropriate levels of security within QOREX and QOREX hosting is UK based using dedicated servers.

Working together with QOREX

At QOREX we are passionate about making a difference to health and social care. We know that services are under real pressure and the success of STPs is critical to the future of our healthcare system. We are keen to work together to help you achieve this transformation.

The quantifiable benefits that you can expect from QOREX PATH include:

- Your time and resource is focused on priority initiatives that bring the highest value
- You manage one set of data, one version of the truth to enable evidence based decision making
- You apply best practice principles through QOREX PATH so both experienced project professionals and “accidental” project managers work effectively and consistently
- You have visibility of an audit trail of action, achievement and continuity

For your route to effective STP delivery, contact us for a no-obligation demonstration of QOREX PATH.
